SN 2022/56 - ACOPOS products with new Life Cycle Status 'Classic'

Key Information

Because of the discontinuation of the ACOPOS series, ACOPOS related products are set on the new Life Cycle status 'Classic'. Detailed information about affected products and the further discontinuation procedure for that is give by this Sales Notice.

Sales Notice Number	SN 2022/56
Creation Date	 17.11.2022
Last Modified Date	 24.11.2022
Author(s)	Wilfried Guerry Anton Meindl
Sales Notice Type	Product-related
Portfolio Line	Motion and Mechatronic Systems
Quicklinks	ACOPOS B&R Industrial Automation (br-automation.com)
Status	VALID
Confidentiality	GLOBAL

Life Cycle Status 'Classic'

As announced during GSC, ACOPOS 8V will be the first product to follow our new discontinuation procedure. Therefore, the entire ACOPOS 8V family will be transitioned into SAP to Classic phase.

That means this products are not longer recommended for new projects. This phase is the beginning of the phase-out of products.

Impacted devices - general

ACOPOS

We discontinue the ACOPOS in two steps:

Step 1:

- Discontinuation of all ACOPOS devices, excepted the high power devices. This discontinuation starts now, all discontinuation dates are fixed and will published in a separate Sales Notice. All concerned ACOPOS devices are set on 'Classic'.

Step 2:

- Discontinuation of the ACOPOS high power devices. The discontinuation of the high power devices will start when we introduce the successor products, which are not available now. Because the concrete dates are not clear now (approx. in 2 years), the high power ACOPOS devices remain in 'Active' phase until we have a resilient planning.

Plugin-modules, cables and accessories

The major quantities of plugin-modules, cables and accessories of the ACOPOS series are used in the discontinued ACOPOS, this parts will be set on 'Classic' too. Because this parts are also used with the high power ACOPOS, the parts will stay in 'Classic' until we discontinue the high power ACOPOS.

Sets

All set 8ACC:... or 8ACP:... will also be switched to Classic.

Impacted devices - product lists

ACOPOS devices

Material	Description
8V1010.00-2	ACP servo drive 3x400-480V 1.0A 0.45kW
8V1010.001-2	ACP servo drive 3x400-480V 1.0A 0.45kW L
8V1010.50-2	ACP servo drive 1x110-230V 2.3A 0.45kW
