Announcement: Update on Standard Lead Times (SLT)

Dear valued partner,

we are contacting you today to update you on the planned adjustment to our indicative Standard Lead Times (SLT).

Our efforts and investments in production expansion have resulted in an increase of our overall global delivery volume, supported by a positive shift in the supply situation for the component market.

Accordingly, we expect a reduction in our current SLT in the third quarter 2023, orders issued from August 2023 onwards of approximately 26 weeks. We are also reviewing orders currently indicated with 52 weeks SLT for a potential adjustment for an earlier delivery date – your B&R Sales contact will be in touch with further information if this is a viable option for any of your existing open orders.

While we anticipate announcing final details in August, it's important for us to retain a transparent line of communication with you as a valued partner. Equally, we also want to take the opportunity to thank you for your patience and continued trust.

We hope that this adjustment of the SLT and the order landscape is welcome news, indicating a critical step towards increased stability in planned delivery dates. Please rest assured that our teams will continue their efforts and remain at your disposal.

Best regards,

B&R Industrial Automation GmbH

Wolfgang Esterbauer
Sales Operations Manager

Adam Dieckmann
